

Hello & Welcome

artnovion

... to Our Universe

We bring love to the business,
We are proud to present you a unique
brand that drives high performance
acoustic products for ultimate ambiances
design.

A black and white photograph of a hand pointing towards a circular mark on a textured surface. The background is dark and grainy, suggesting a technical or industrial setting. The hand is in the foreground, with the index finger pointing towards the center of the frame. The circular mark is slightly lighter than the surrounding texture, drawing the viewer's eye.

A brand driven by passion

Artnovion is driven by passion. Passion for acoustic, passion for performance and our eternal passion to deliver an amazing customer experience. Together with our clients, suppliers and distributors, our ambition is to create unique trendsetting & high performance products.

artnovion

We Engineer for Performance and Design for Emotion

We engineer acoustic performance for unlimited design solutions. Our every day mission is to drive innovation and help you create groundbreaking ambiances. We believe less is more & performance breaths emotion.

Our products shape sensorial illusions that shift between high acoustic performance and unique visual effects.

artnovion

in a constant pursuit of perfection.

With our customer at heart, perfection is our mission. Driven by emotional performance we care about every detail and with high precision we blend the best of design, technology and engineering. Dynamic as our market, we adapt in a mission of constant improvement & offer an optimized user experience from sales, project management to shipping.

artnovion

We are proud to present you the passion driven acoustic brand.

Together with a talented team, we work hard to push the boundaries of acoustic engineering and create a unique collection of trendsetting & high performance products.

Our every day mission is to drive innovation and engineer acoustic performance for unlimited design solutions. We believe simple is more & performance breaths emotion!

With technology at the core and a

solid partnership network we blend the best of design, engineering & customer service, offering a collection of products that shift between high acoustic performance and unique visual effects.

Dynamic as our market and with the customer at heart, we adapt in a mission of constant improvement & offer an optimized user experience from sales, project management to shipping.

Our clients inspires us, and we love inspiration. To better answer your needs we have been setting up new service channels that optimize commercial, design and production flow so we can provide you the best user experience.

artnovion

**... and welcome you in our
Journey to build an amazing future together.**

We dream about building this global community and how together we can create the most groundbreaking and comprehensive set of acoustic treatment solutions and designs.

We love what we do and look forward to work with you!

Enjoy Artnovion's voyage **here**.

The image shows a close-up, vertical view of cork material. It consists of several horizontal layers of cork sheets. The top layer is a smooth, light brown cork sheet. Below it is a darker, more textured layer, possibly a different type of cork or a treated layer. The bottom layer is another smooth, light brown cork sheet. The central strip is a textured, fibrous material, likely cork, that has been processed to have a rough, natural appearance. It is positioned horizontally across the middle of the image, overlapping the layers. The overall color palette is warm, ranging from light tan to dark brown.

Empowered by Nature's premium materials.

artnovion

Designed for unlimited ambiances.

Engineered for performance and designed for emotion, Artnovion's products aim to define ambiances and inspire the community. We blend atmospheres and offer unlimited design solutions that fit your dreams. From modern environments to high tech atmospheres and minimalist interiors we've created a unique line of products that design a continuous visual pattern, creating the unexpected illusion of tridimensional perspectives.

A special collection that will fit just perfectly in your house.

Impulso Acoustics.

The most advanced acoustic App.

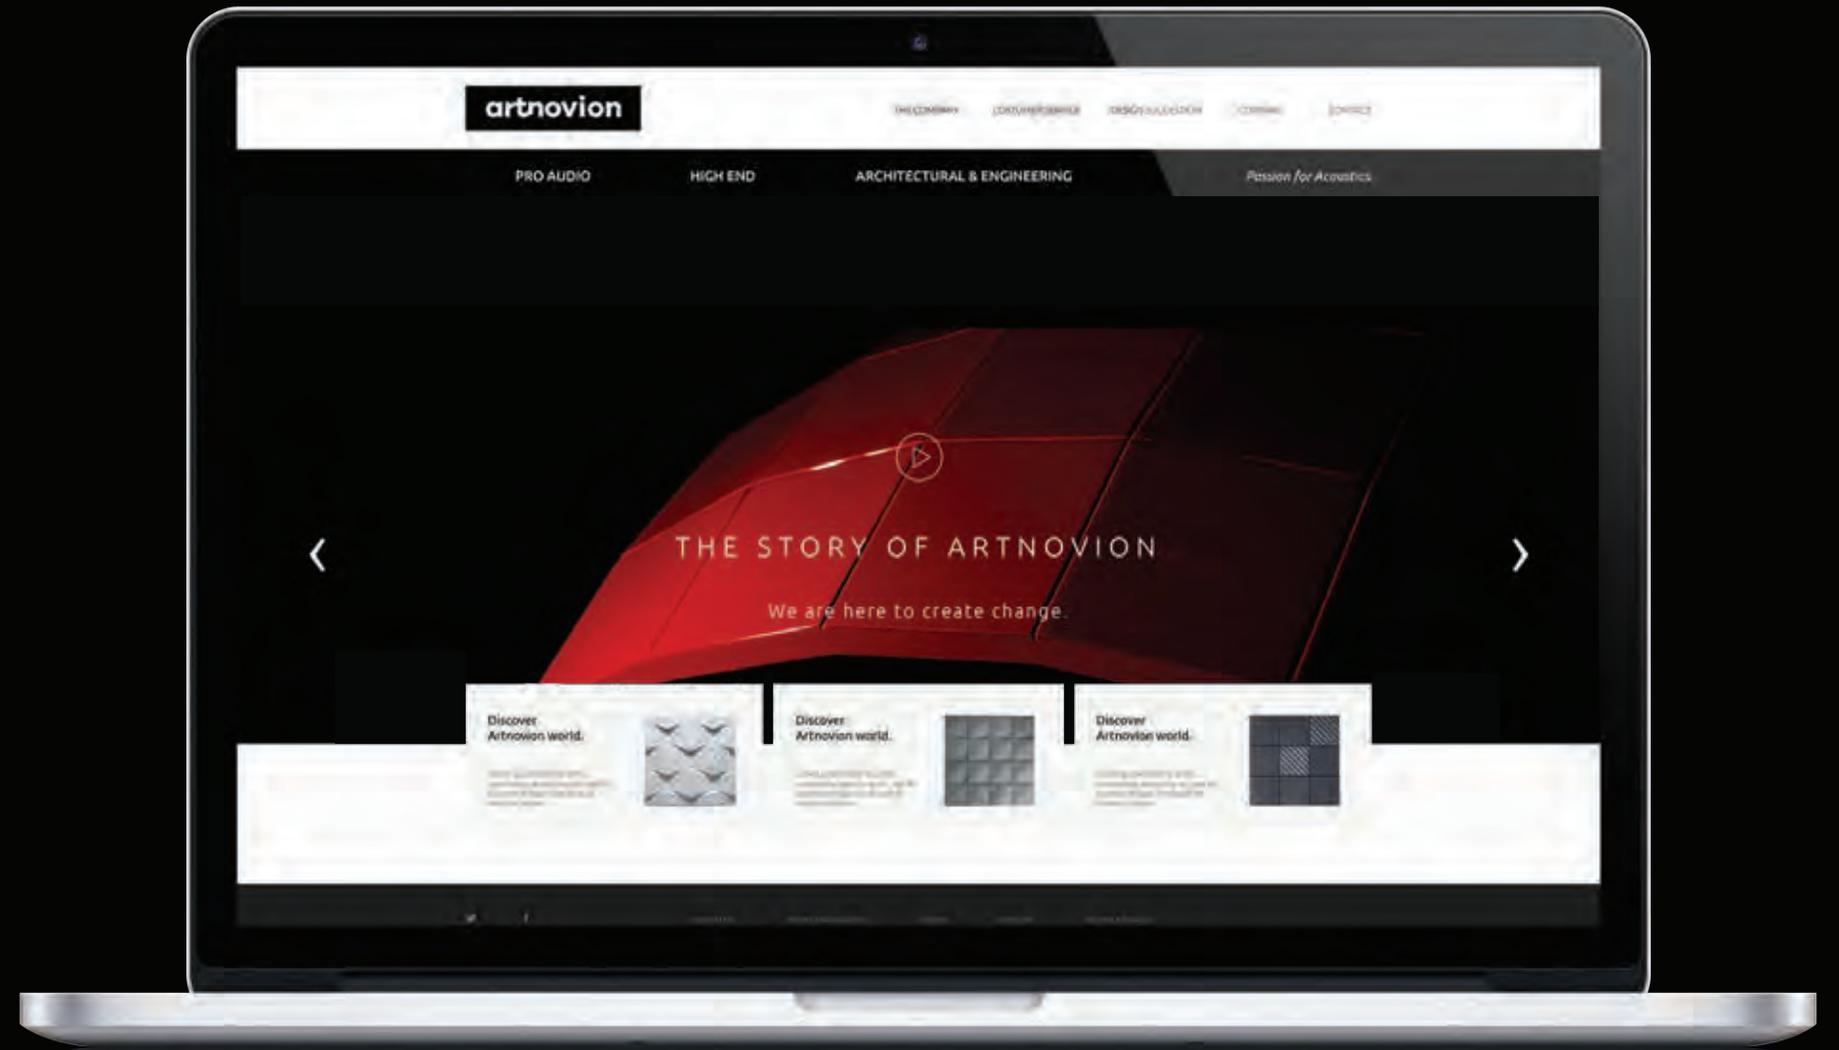

Our true Passion for Acoustics led us to develop the best acoustic measuring mobile app & make it **free for everyone.**

Available soon at your Apple app store.

A unique Digital Experience On Your Desktop.

A design driven by the commercial target of 3 costumers and correspndente unique ambience that drives the online & offline environments.

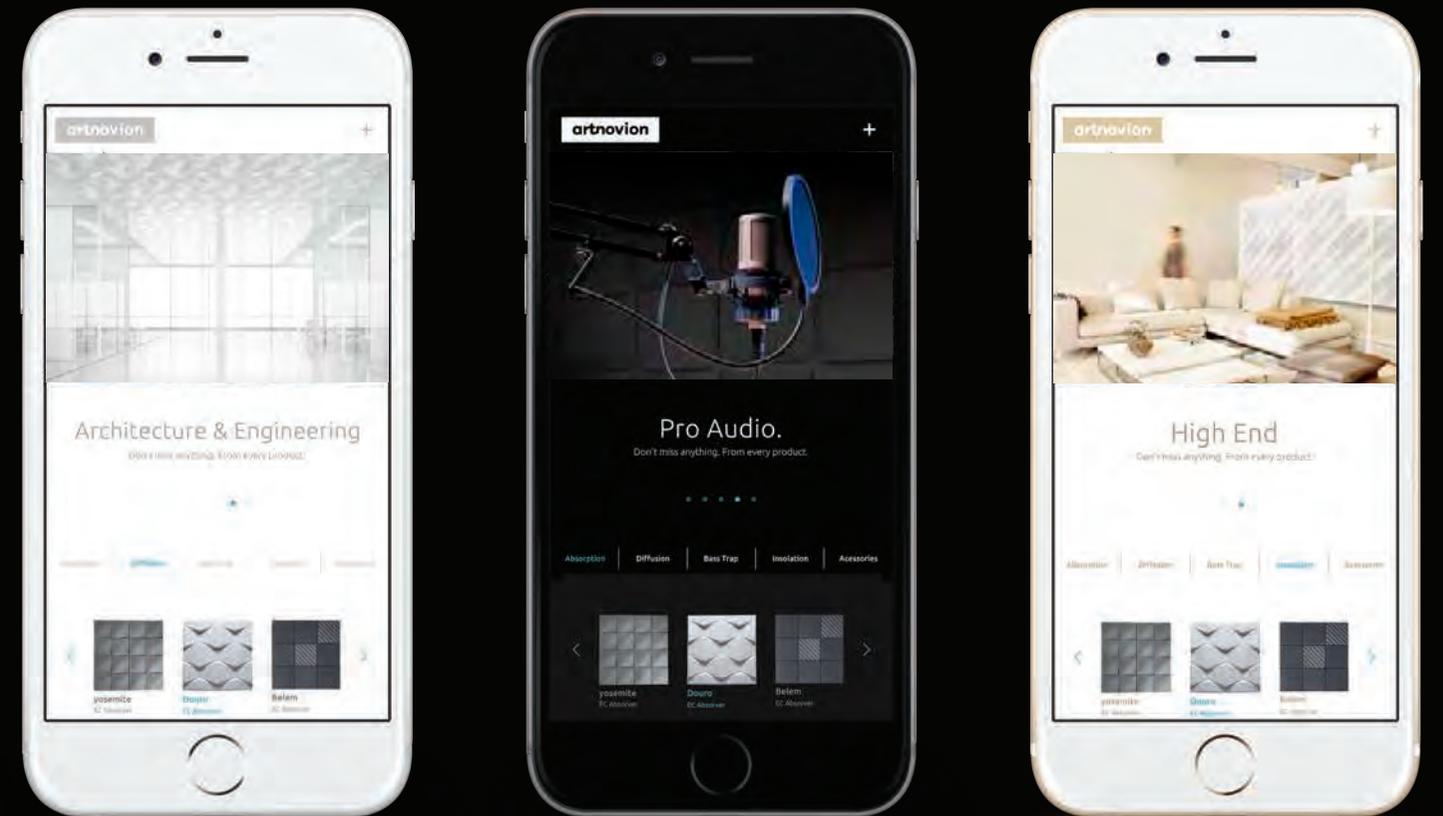

www.artnovion.com Find out more here.

Portable. With you, everywhere.
Mobile web.

Engineered and programmed from scratch our design empowers a unique online platform with an intuitive design. With a mission of constant improvement we developed an optimized service for our clients and an close customer service that bridges the relation between our engineering teams and the client.

Packaging & Shipping Optimization

Because Artnovion believes that less is more, we take every aspect of product optimization seriously. All our products have been conceived to deliver the best performance at the lowest cost, in every facet of the product cycle, from production to packing and shipping. By stacking panels with each other, we were able to significantly reduce packaging volumes, enabling you to transport more panels per box and to reduce freight costs in 33%.

We did this without compromising product thickness, which allows us to guarantee high performance with less raw material usage, and to reduce our ecological footprint.

Product Performance

Because Artnovion is all about premium acoustic performance, the development of all our products aimed to combine the very best performance with the best design. Regardless of the product function, either for absorption, bass trapping or diffusion purposes, we always deliver premium performance

together with a premium ambiance. With Artnovion you will only have to choose the product line that fits in your environment and it will always perform at its best.

Our tuned products cover the full frequency spectrum, from low to mid or high frequencies. The innovative

design of our rear panels' air cavities provides maximum absorption surface and extra absorption coefficient efficiency, smoothing the absorption frequency spectrum. Our products can be used on walls, ceilings and corners, with easy access to audio and electricity cabling.

Product Quality and Quality Control.

Artnovion production of acoustic panels uses state of the art techniques closely motorized by the highest standards of quality control. From the quality of raw materials to final product variation control, everything in our processes comes together to make sure our clients get a flawless product.

The structural quality and endurance of our products was also taken into account: temperature induced material variations are prevented by a bone structure specifically introduced in our production process for this purpose.

Integrated fixing system.

Mechanical and Chemical
The mounting and fixing mechanisms are an important feature of our acoustic panels. Because we take into account the specific needs of our customers, we have developed and provide for every panel two options for the fixing system: mechanical or chemical. Our customers will be able to choose, which system to apply according to their needs and preferences.

*We look forward to have **You** on this amazing journey.*

Passion for Acoustics.
